

Summary

ALOXIDE CT-850 prevents rust on the surface of bevel groove and does not affect welding. It is a product used as an anti-rusting and anti-adhesion agent for improving weldability.

Feature

- Maximum prevention of POROSITY & PINHOLE
- Improved anti-rust and anti-corrosion
- Prevent adhesion of welding spot
- Role of base paint and prevention

Uses

- High Tension steel & mild steel
- Surface rust prevention, prevention of corrosion and prevention of adhesion of welding spot
- Role of base paint and prevention

Product data

Appearance	Liquid Aluminum Color
specific gravity (20°C)	1.12±0.05
Flash test	Nonflammable
Coating thickness	7~10μ
Drying time	5~10 min.
Main component	Alumium Flake, Linseed Alkyd Resin, Petroleum Distillate

How to use

- Clean the surface of the base material before use.
- Mix the contents thoroughly. (Aerosol Type should be used after shaking enough until the bead sound.)
- For Aerosol Type, After use, sprinkle the can upside down for 2~3 seconds until gas is discharged. After that, store it in a safe place.
- Spray 20~30cm away from the surface.
- The thickness of the coating should be determined by considering the rusting period and storage conditions.

Storage & Handling Precautions

- Do not use in an enclosed space that is harmful to human body.
- Be careful of fire and make sure that the work area is well ventilated.
- Store at a temperature of 40°C or lower and keep out of reach of children.
- Because it contains organic solvents, ventilation is required when used indoors.
- Make a hole in the used can and dispose of it in the designated place.
- Please refer to Material Safety Data Sheet (MSDS) before use.

📦 Packing unit

- 420ml Aerosol 20EA/Box
- 4, 18 Liter Steel Can (Buyer's order only.)
